

Fleeced Satin

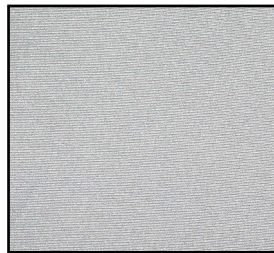

Fleeced Satin features a woven polyester outer shell with a super soft white nylon fleece finish inside to provide a gentle touch to fine car finishes. Fleeced Satin fabric has a slight stretch for a more contoured fit (but not the body-hugging stretch of our Form-Fit® covers). The result is a very nice mid-weight custom cover! 4.7 osy vs. 7.4 osy for Form-Fit (that's ounces per square yard). An excellent value for indoor use (and limited outdoor use - like at a weekend car show), Fleeced Satin is offered in three colors.
