360°ding/dent protection for use in all parking situations

Carband can pay for itself by helping to protect against costly door dings and paint chipping.

Designed for use in private or public garages, airports, workplace and public parking lots or anywhere additional protection is wanted.

Carband is easily installed by placing one end over the front or rear bumper area & then stretching the other end over the opposite bumper area. Adjust along the sides to assure best protective coverage.

Carband can even be installed over a car cover for maximum protection.

Carband's Spacer technology fabric provides a protective barrier for your vehicle.
