

Application Guide for Masks & Front End Protection

Masks - LeBra

*"World's largest selection of custom front end protectors,
deflectors and masks"*

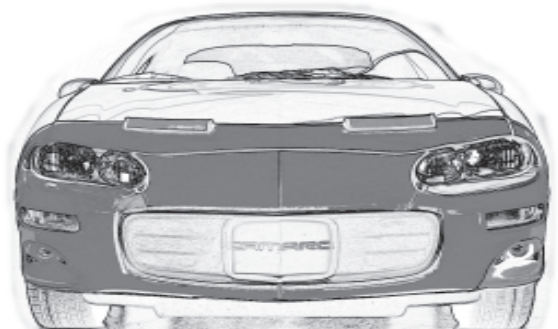

Mini and Custom Hood Protectors are budget priced and protect the area of the hood that gets the most abuse.

Deflector-Protector® covers the leading edge of the hood and has a built-in bug deflector!

Full coverage masks provide maximum front end protection. Some models allow the hood to open with the mask in place (MM series and most LeBra). Some designs are single piece and the hood is not covered, but can be opened with the mask in place. All are easy to install and remove.
